

# **Technical Data Sheet**

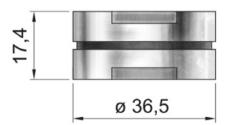

# **HIGH TEMPERATURE DATA LOGGER SterilDisk**

### **Features**

- Small size
- Completely food grade and waterproof
- All software calculate lethality value (F0, PU, A0 ecc.)
- User replaceable battery (software shows battery status)
- Accredia (NIST equivalent) traceable calibration certificate included
- Available extended calibration from -20°C (order extra calibration points; in case of wide calibration range the accuracy might be worse)
- Application for Autoclave verification, Implement HACCP programs, Foods Preparation and Processing, Environ mental Studies, Well Monitoring, Dishwasher Testing Pasteurization

### Drawing

unit: mm

## **Technical data**

Temperature range: -20...+140 °C

**Accuracy:** ±0.2 °C (within the calibration range)

**Resolution:** 0.01 °C

Memory capacity: 20,224 reading

**Battery type:** high temperature Lithium battery

**Battery life (@different interval):** 2 years @ 1 minutes or 16 days @ 1 second [1,400,000 acquisitions @ 1 second step continuously (calculated time @25°C)]. Storage or operation above +50°C significantly

reduces battery life. Interval: 1s...24hr

**Body Material:** 316 Stainless steel

**Seal material:** Fluorine Kautschuk Material (FKM: Viton®)

Operate system: Windows XP, Vista, 7, 8, 10

**Exporting:** PDF, Excel

**Dimension :** Φ36.5 mm x 17.4 mm

Weight: 80 a

Pressure resistant: 6 BarG **Protection type:** IP68

pasteurization process

Oven/Retort

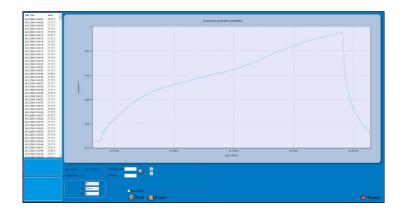

\*Note: Furthermore, these process that are shown, please do not hesitate to contact us for consulting

# **Technical Data Sheet**

# **HIGH TEMPERATURE DATA LOGGER SterilDisk**

### Accessories

These are necessary equipments that using with products and increase efficiency.

**DiskInterface HS Mini:** is the connection bay used in SterilDisk series, P-Micro, S-Micro model for downloading data and programming all models of high

temperature data loggers

**DiskInterface HS:** is the connection bay used in all model for downloading data and

programming all models of high temperature data loggers

Universal Multibay: is the multiple connection bay used for downloading data and programming all models of high temperature data loggers. It

allows to connect up to 5 data loggers of each supported model to be programmed and downoaded at the same time.

 $\textbf{TS17MU:} \ \ \text{use to open data loggers for battery replacement.}$ 

Note : For all of sterilDisk model, need 2 items for opening For others model, need only 1 item for opening

**TS01SPDB:** Battery and O-ring for SterilDisk.

**TS01SDOR:** O-rings couple for substitution on SterilDisk. (Package of 10 couples)

SPD Software (FREE): It allows to start the devices setting the start delay, mission du-

ration, notes. After download data are then displayed on graph, with zoom function, and table, exportable in Excel.

TS Manager Software: it allowed to do everything as a SPD software and has more functions such as multi-user, having login and password, Synchronized data table with statistics, etc. Downloadable from Tecnosoft website and works with its hardware protection key
