

SINGLE-USE TEMPERATURE DATA LOGGER

RC-17

***The data logger is single use device, it cannot reuse if device begin to record.*

Waterproof plastic bag
It will protect the data logger from water and make the device become **IP67**

Features

- This temperature data logger is mainly used for temperature monitoring and recording of food and medicine storage and transportation environments, such as refrigerated bags, refrigerated trucks, containers, etc.
- This product is connected to a computer via USB, and the recorded data is directly output as a PDF report
- Powered by a CR2450 wide temperature lithium battery
- The temperature probe, NTC is built-in
- The waterproof level reaches IP67

Technical data

Type : single use
Temperature sensor : NTC sensor
Temperature range : -30....+70°C
Accuracy : ±0.5°C (within -20....+40°C), ±1°C (others)
Resolution : 0.1°C
Recording period : 120 days (or 180 days, need to configure on software)
Memory capacity : 16,000 readings
Battery type : built-in CR24050 wide temperature lithium battery
Shelf life : 2 years (storage and use in normal temperature environment)
Data file : Auto PDF report (no need software for exporting)
Interface : USB 2.0
Dimension : 93 x 58 x 8 mm (WxHxD)
IP protection : IP67
Weight : 20g

Exporting report

Auto PDF report
After recording, only connect the device with PC, the report will generate automatically. No need software for exporting report
